

BSBWHS419 Contribute to Implementing WHS Monitoring Processes

BSBWHS419 Contribute to Implementing WHS Monitoring Processes

[START COURSE](#)

Overview

This online workbook is pre-course material only - you are still required to attend a practical session and successfully complete a practical assessment before you will be awarded a nationally recognised statement of attainment.

Take your time and read each section carefully, it might help for you to take notes. Make sure you answer all of the checkpoint review questions along the way. The results of this will be sent to your trainer as part of your course assessment.

What you will learn

This course is designed to help you understand all of the elements required to Contribute to Implementing WHS Monitoring Processes.

SECTION 1

1.1 INTRODUCTION

1.1 Introduction

1.2 WHS LEGAL REQUIREMENTS

Lesson 1 of 71

1.1. Introduction

This training course is based on the national unit of competency **BSBWHS419 Contribute to Implementing WHS Monitoring Processes.**

This unit applies to individuals who assist with using a range of measuring devices to identify hazards, assess risks and monitor the effectiveness of risk controls.

The unit applies to people who work in a broad range of WHS roles across all industries.

This unit describes the performance outcomes, skills and knowledge required to assist with monitoring a range of physical agents and conditions relevant to work health and safety (WHS).

NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. The term WHS will be used throughout this training course.

Lesson 14 of 71

1.3.1 Common Agents or Conditions

Some of the common or typical physical agents and/or conditions relevant to WHS that may need to be monitored could include:

Biological Agents	+
Electricity	+
Fibres, Dusts and Particulates	+
Fumes, Mists, Gases, and Vapours	+
Heat and Humidity	+
Light	+
Noise	+
Radiation	+
Vibration	+

Question

01/04

Section 1: Question 1 – Which two (2) of the following are examples of the regulatory requirements and standards that may apply to the monitoring process?

- Commonwealth and state or territory WHS Acts, regulations and codes of practice.
- Work Method Statements.
- Work instructions and induction procedures.
- Privacy laws and confidentiality.
- Emergency procedures.
- Exposure standards for atmospheric contaminants in occupational environments.
