Lasting, quality compliance.

TLRG
**DIGITAL
ROBOT**

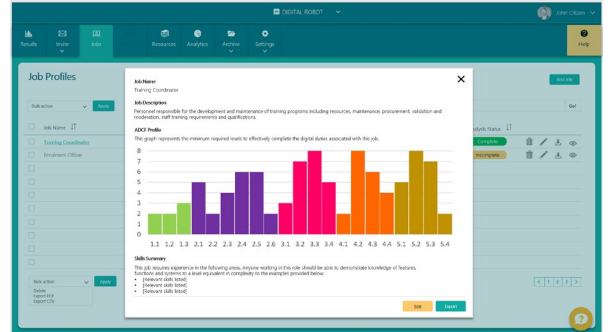

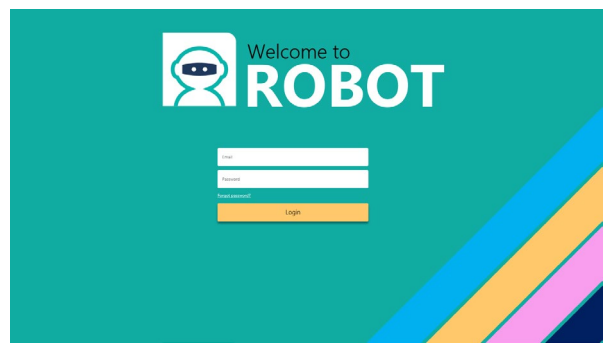

Digital Robot

A brand new platform to access tools for digital capability assessment and support.

- Assess learners against the entire ADCF.
- Quiz works on mobiles.
- Compare results to course profiles.
- Get recommendations.
- Develop digital skills.
- In-depth reports & analytics.

Digital Robot offers a number of benefits for your organisation, including:

- **Improved Learner Outcomes:** Digital Robot helps you to ensure that your learners have the digital skills they need to succeed in the digital world.
- **Improved Staff Effectiveness:** Make sure you recognise any gaps in your staff's digital skills in relation to their job role and understand the urgency of any training required.
- **Reduced Risk:** Digital Robot helps you to identify and mitigate risks associated with digital literacy gaps in both your current staff and potential hires.
- **Increased Efficiency:** Digital Robot automates the process of testing and assessing digital capability, saving you time and resources.
- **Data-Driven Decision Making:** Digital Robot provides detailed reports that can be used to make informed decisions about training and development.

Digital Profiler

A powerful digital capability skills assessment in the palm of your hand. The Digital Profiler questionnaire identifies an overall measure of experience, knowledge and familiarity with digital technologies, environments and systems. With the ability to test against the 21 skills at all 8 levels of the ADCF, the Digital Profiler is **suitable for everyone**.

Use the results from Digital Profiler in any of these 3 streams with Digital Robot:

for **Study**

Help your learners by identifying the gaps in their digital capability compared to the course they are enrolled in.

In-depth reports highlight areas requiring upskilling, and identify the skills that a person already has.

Tailored training recommendations ensure that every learner gets the support they need.

for **Work**

Upskill personnel in existing roles, or prepare for a job by developing the required digital skills.

Job profiles are created within the system and reports identify areas that need development and prioritise skills based on specific work duties.

Get a complete **action plan** to upskill anyone for any job.

for **Life**

Develop those digital skills that are relevant in everyday life!

After completing the questionnaire, the results can be compared to different Digital Citizenship levels to identify areas requiring development.

A **bespoke training program** can then be undertaken via a series of online digital skill courses.
