

# HLTSS00067 Infection Control Skill Set for Transport and Logistics (HLTINFCOV001)

**HLTSS00067 Infection Control Skill Set for Transport and Logistics (HLTINFCOV001)**

[START COURSE](#) [DETAILS](#) ▾

### Overview

This online workbook is pre-course material only - you are still required to attend a practical session and successfully complete a practical assessment before you will be awarded a nationally recognised statement of attainment. Take your time and read each section carefully, it might help for you to take notes.

Make sure you answer all of the checkpoint review questions along the way. The results of this will be sent to your trainer as part of your course assessment.

### What you will learn

This course is designed to help you understand all of the elements required to comply with infection prevention and control policies and procedures.

SECTION 1

Lesson 1 of 53

## 1.1. Introduction

---

This training course is based on the national unit of competency HLTINFCOV001 Comply with Infection Prevention and Control Policies and Procedures.

This unit applies to individuals working in the transport and logistics sector.

It describes the skills and knowledge required to follow organisational infection prevention and control procedures, including implementing standard and transmission-based precautions and responding to infection risks.

After completing this course participants will have the knowledge and ability to assist with:

- Follow standard and additional precautions for infection prevention and control.
- Identify infection hazards and assess risks.
- Follow procedures for managing risks associated with specific hazards.

**NOTE:** The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. The term WHS will be used throughout this training course.

Lesson 15 of 53

## 1.4.3 Infectious Diseases

When a person (or animal) becomes ill from an infectious microorganism, it is called an infectious disease.

Some common infectious diseases you may have heard of are:

Bacterial	+
Fungal	+
Viral	+

Infectious diseases are highly contagious and depending on the nature of the organism they can be spread from one person to another, animal to person and so on.
